Description

Modern ITX power supply Akyga® AK-I2-150 Ultimate series **150W**, dedicated especially for mini-ITX cases.

The power supply is equipped with **P4 4-pin** connector, **MOLEX** connector, **SATA** connector and a universal **24-pin** motherboard connector. A guarantee of high efficiency is the **80 PLUS®** compatibility which ensures that at least **80%** of energy provided by the power supply is received by computer's components and a maximum of 20% of energy is lost in the form of heat. High efficiency allows effective supplying and so the stable operation of the power supply affects the reliability of all components of the computer. Effective cooling is provided by efficient, silent fan of **4 cm** diameter with automatic speed control.

An important aspect is the presence of several important protectors (OVP, OCP, OPP, OTP, SCP) and an **active PFC filter** that protects and prevents motherboard, processor and other parts from damage and stabilize the operation of the power supply so that it works without any unwanted interference.

Sold with **1.5 m** power cord.
